

AGRICULTURE – HOPS PLANT

FGC SOLUTIONS FOR HOPS PLANT

An excellent harvest is the result of a long process that begins with the construction of a solid plant that accompanies the growth of the plant protecting it over time. Hops, in particular, need adequate and very resistant supports that can withstand the weather and the loads of a flourishing growth. For this reason, thanks to the collaboration with our experienced customers, we can propose the best solutions starting from high-strength ropes and completing with tools and accessories for installation.

GALVANIZED STEEL STRANDS AND WIRE ROPES

1 x 7

1 x 19

7 x 19
